

Should your advisor manage your 401(k)?

Business as usual

If you have a 401(k), you may have used a target-date fund. When you open your 401(k) account, you may select a "target date" year of retirement, pick a TDF, and then the TDF automatically selects investments for you.

+ **95%** of 401(k) plans offer target-date funds¹

Is a TDF right for you?
Read on to find out!

When TDFs can work for you

Target-date funds can be beneficial:

- + When you don't have outside investments
- + When the majority of your household assets are in a 401(k)
- + When your finances are simple (not yet working with an advisor)

+ **6/10**

workers do not feel comfortable making investment decisions in their retirement accounts²

+ 

Easy to use
for new investors

+ 

More conservative as
you near retirement

Not integrated
into your full plan

When professional management may be best

If you're working with a financial advisor, it's time to consider your 401(k) as part of your full financial life for comprehensive management.

Your advisor can make sure your investments:

- + Are diversified to lower risk and increase opportunities for higher returns
- + Work in harmony with your personal risk tolerance and goals at the forefront

Personalized planning, not one-size-fits-all

Balance with all of your assets

Professional review of performance & fees

Comprehensive retirement income planning

Cohesive financial strategy, pre-and post-retirement

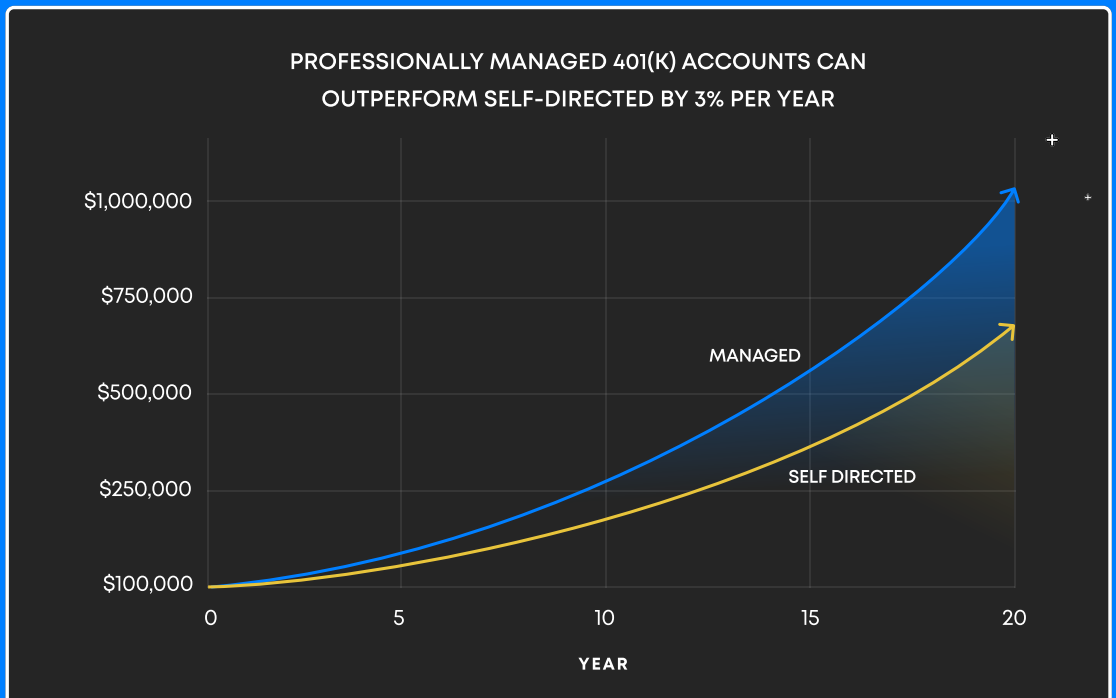

Minimized taxes with asset location

How your advisor can help

Studies show professional management of retirement accounts can grow them by 3% more per year; that's 75% over the span of 20 years.³ As you near retirement, a more tailored plan is needed, and your financial advisor can help you reach your goals.

Individuals who receive professional advice tend to save **22%** more than they would in a TDF.⁴

Ask your advisor

Thousands of retirement savers across the country use Pontera to get professional management of their 401(k) by their trusted advisor.
